GLASSBLOWING

## Turning Up the Heat

Portland artist **Andy Paiko** ignites a beautiful match-up between form and function, along with a passion for preserving a delicate, ancient art form.

VESSEL OR SCULPTURE? Andy Paiko offers no easy answers. Consider his Bell Jar and Reliquary series, where the expressiveness of vessels made by sculpting molten glass with air trump what they might contain. Though pandemic-era restrictions have kept him close to his studio—"making everything from Christmas balls at \$40 each to massive chandeliers for international restaurants"—when travel normalizes, he will again turn his attention to the future of his 2,100-year-old craft. Creating sustainable practices on the legendary island of Murano, Italy, is among his priorities, as well as better connecting the glassmaking centers of the world—including his own Pacific Northwest, where he's considered central to a glass-craft renaissance. And there's no question about that.
